

AP-BON Side Event at the CBD COP11

15 October 2012, Hyderabad, India

Asia-Pacific Biodiversity Observation Network (AP-BON) was established in July 2009 to promote gathering and integration of biodiversity data in this region and provide those data for analysis and evaluation of the change in biodiversity.

This side event will be a unique opportunity to disseminate the efforts of AP-BON and to discuss future activities of AP-BON toward the integration of traditional knowledge and science for the conservation and sustainable use of biological diversity.

Organizer Ministry of the Environment of Japan (Secretariat of AP-BON)

Date 18:15 – 19:45, Monday, 15 October 2012

Venue Side Event Room 4, HITEX 1, Ground Level, Hyderabad, India
